Portfolio: apanchawate.github.io/portfolio/

Available 1 January 2027 • Open to relocation throughout Germany (Munich preferred) • Up to 50% business travel

PROFESSIONAL PROFILE

Enterprise Test Management and automation specialist supporting international SAP S/4HANA Finance rollouts. Combines UAT planning and governance, workstream/tester coordination, due-date-driven execution monitoring, defect and evidence management, and management reporting with hands-on Python, Jira/Xray API, analytics and AI solutions. Supports Central and Market Rollout Managers with testing preparation, delivery visibility and risk escalation.

SELECTED ENTERPRISE EXPERIENCE

BMW Group — Group Finance Backbone (GFBB) | Client Project

Test Management & Automation Specialist | Jun 2025 – Present | Munich

- Coordinated UAT, pre-UAT, regression and acceptance testing across international SAP S/4HANA Finance rollouts, working with 22 Finance Product Teams and 30+ company codes.
- Agreed test-case execution due dates with testers and Workstream Leads; established daily/weekly cumulative planned baselines and tracked actual execution, scope changes, overdue work and recovery needs.
- Supported Central and Market Rollout Managers with UAT planning, tester readiness, Jira/Xray setup, execution governance, defect coordination, evidence completeness and stakeholder reporting.
- Supported governance of 7,000+ master test cases, 400+ Test Plans/Executions and 1,500+ defects; performed test-case quality checks and trained testers on execution/evidence expectations.
- Created 200+ Jira/Xray dashboards through Python/REST API automation; configured JQL filters, KPI gadgets and testing-specific Jira fields including Defect Classification for actionable monitoring.
- Developed 30+ Python/REST automation solutions for test-case creation, plan/execution setup, repository tasks and reporting; modernized daily KPI reporting from Excel Power Query/VBA to automated workflows.
- Built an automation hub using FastAPI, React, TypeScript and SQLite; used GitHub Actions, self-hosted runners and Playwright for workflow and browser-based testing automation.
- Configured two enterprise AI knowledge assistants on BMW GAIA for Finance and Test Management knowledge support, using prompt design and enterprise knowledge sources.

TECHNICAL & DELIVERY CAPABILITIES

Test Management: UAT, Pre-UAT, regression, test planning, readiness, test evidence, defect lifecycle, traceability, Jira/Xray, Confluence, JQL, Tosca collaboration.

Automation & Analytics: Python, REST APIs, Power Query, VBA, Excel, Power BI, SQL/SQLite, automated KPI dashboards and PDF reporting.

Software & AI: FastAPI, React, TypeScript, JavaScript, Playwright, GitHub Actions, CI/CD, GitHub Copilot, LLM knowledge agents and prompt engineering.

ADDITIONAL PROFESSIONAL EXPERIENCE

Bosch Powertrain Solutions | Intern & Working Student — International Project Management

Sep 2023 – Feb 2025 | Stuttgart, Germany

- Supported international engineering and IT project coordination, milestones, dependencies, stakeholder communication and delivery tracking.
- Supported SAP-related process testing and validation across PLM/ECR, MM, SD and PP, including documentation of findings and corrective actions.
- Created operational reporting and analytics using Excel, Power BI and automation to improve project transparency.

UNR Engineering Technologies | IT Project Engineer

Jul 2020 – Sep 2022 | Nagpur, India

- Supported Agile project delivery, cross-functional coordination, risk/issue tracking and stakeholder reporting using Jira and Confluence.
- Contributed to process improvement, requirements clarification and operational reporting.

UNR Engineering Technologies | Graduate Trainee

Jan 2019 – Jun 2020 | Nagpur, India

- Supported project planning, data analysis, Power BI dashboards and management reporting for operational improvement.

SELECTED PROJECT & AUTOMATION EXAMPLES

- Due-date-driven UAT control: coordinated individual test-case due dates and visualized cumulative planned vs. actual execution alongside evolving test scope.
- Jira/Xray dashboard automation: Python REST API workflows for Test Execution creation, JQL filters, dashboards and KPI gadget configuration.
- Reporting modernization: transformed Excel Power Query/VBA reporting into repeatable management KPI outputs and automated data pipelines.
- Automation Hub: FastAPI/React/SQLite solution with GitHub Actions workflows and Playwright browser-based tests.
- Defect intelligence: Jira custom Defect Classification (including Test data) and targeted filters to surface blockers and support workstream follow-up.

EDUCATION

Master's — MBA & Engineering (Operational Excellence) | Hof University of Applied Sciences, Germany | 2022–2025

Bachelor of Engineering — Electrical Engineering | Savitribai Phule Pune University, India | 2016–2019

TRAINING & CERTIFICATES

Atlassian Agile Project Management Professional Certificate • Lean Six Sigma Green Belt coursework • SAP S/4HANA university coursework

PMI-ACP-related LinkedIn Learning coursework (not a PMI-issued certification).

LANGUAGES & MOBILITY

English — Fluent | German — B1 certificate (actively improving spoken proficiency)

Available from 1 January 2027 | Open to relocation throughout Germany; Munich preferred | Up to 50% business travel
